# YOUR CONNECTED SOLUTION

## Personalized tower settings for each physician

A unique image for each user, this is now possible with personalized user profiles. More brightness, less red colors, etc... every surgeon has his own perception of his work environment and is used to a certain type of image. Then, physicians can program their parameters, save them into their own user profile, and retrieve them each time they use the tower. One tower, multiple users and as many settings as desired.

## Touchless technology to connect to your profil

Personalized profiles can be stored on a Scard. Simply approach your card to the camera control unit and... this is it! You're connected and all your preferred parameters are displayed. Now, get ready for your surgery!

## Enabling the elements to communicate together

ISYME is an exclusive technology connecting all the towers elements together and taking the best of each to provide the best user experience, no matter what happens. Above all, everything is connected to the camera and can be controlled directly from the camera head to increase the ease of use for surgeons. ISYME provides then an optimal surgical environment.

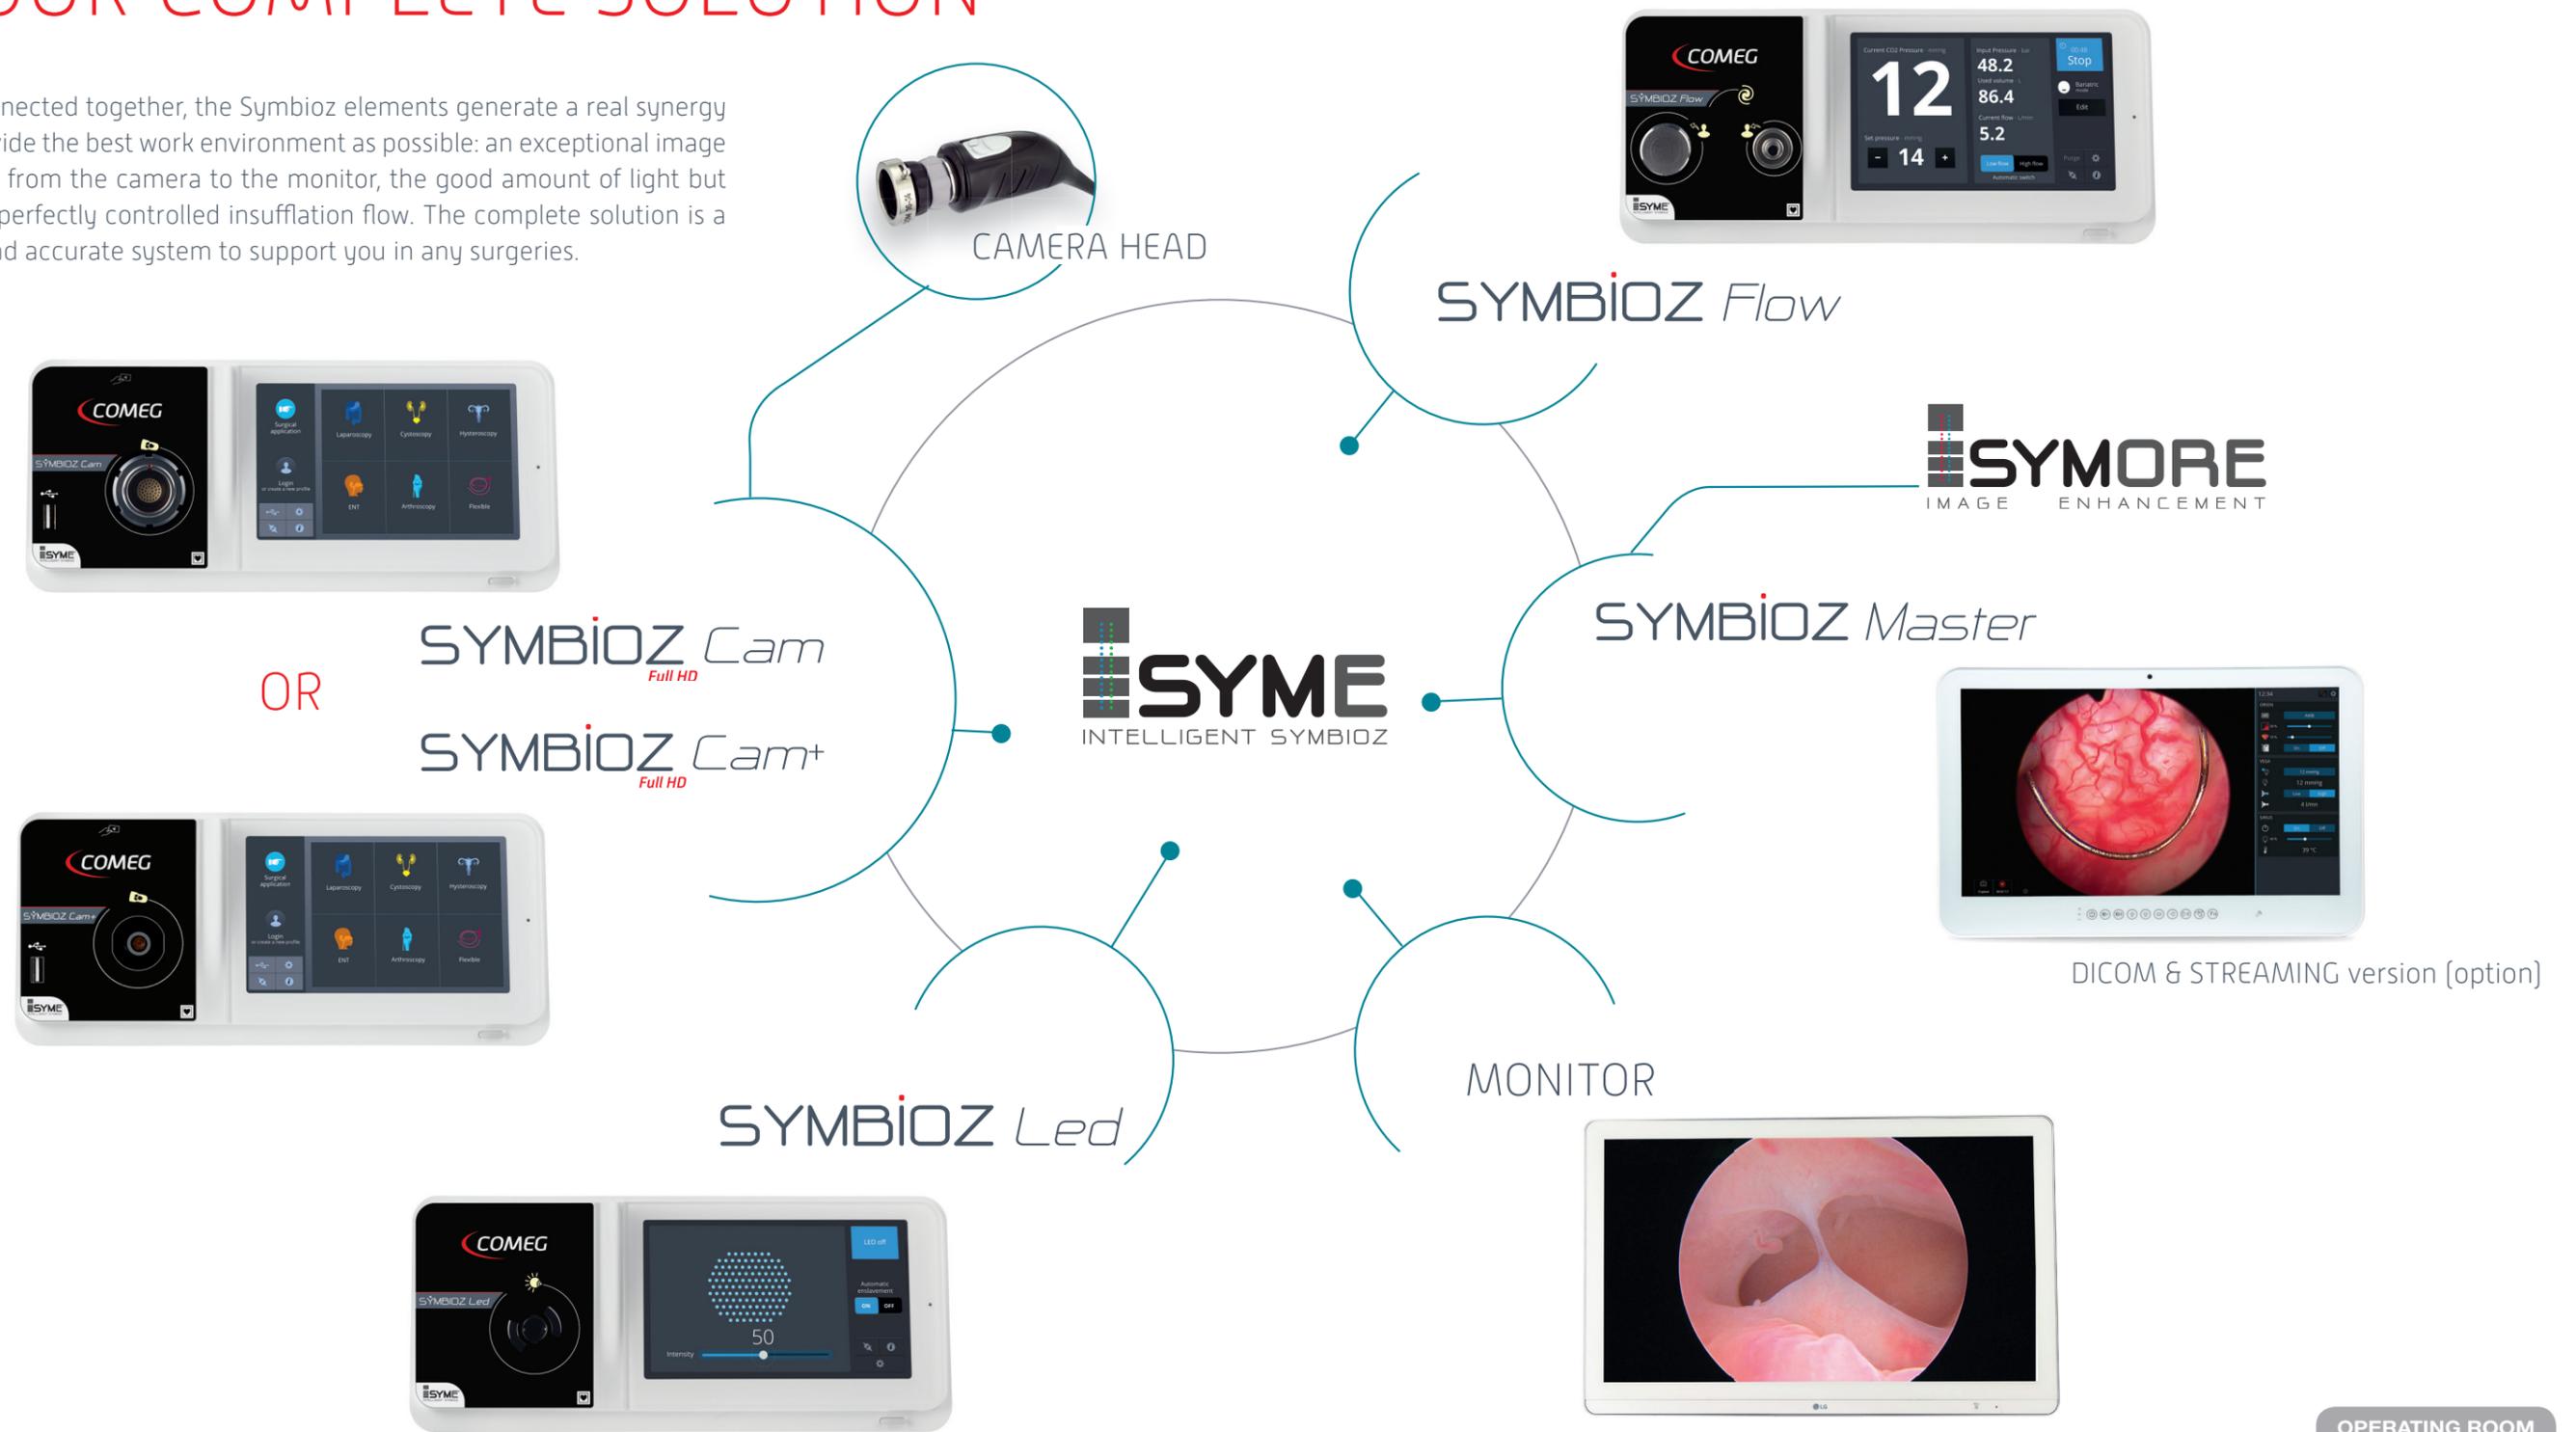

« This endoscopy system is a model of simplicity and is stuffed with technology. This is how my operating room staff feel the equipment and this is how I use it. The same logic is found in the touch screen for example. And the same is true for the camera head where numerous adjustments can be made, almost intuitively without disturbing the work of my team and its coordination. For a surgeon, this is essential! »

Dr. N. CASTAING  
Gynecology Surgeon,  
Centre Hospitalier des Quatre Villes,  
Saint Cloud, France

# YOUR COMPLETE SOLUTION

All connected together, the Symbioz elements generate a real synergy to provide the best work environment as possible: an exceptional image quality from the camera to the monitor, the good amount of light but also a perfectly controlled insufflation flow. The complete solution is a safe and accurate system to support you in any surgeries.

OPERATING ROOM  
CERTIFIED

Connected

SOPRO, a company of the ACTEON Group, is the manufacturer of the EC marked class I (SYMBIOZ Cam, SYMBIOZ Cam+, SYMBIOZ Led and SYMBIOZ Master) and IIa (SYMBIOZ Flow) medical devices described in this document. These medical devices marketed under the commercial brand COMEG are not covered by medical insurance companies. Please read carefully the instructions in the device manual before use.

# CONNECT YOUR CMOS CAMERA TO HIGHLIGHT YOUR SURGERY

## Product benefits

### High quality images

Having control of your surgery, identify the details, brings more quality to your work. With a Full HD camera, and adjustable image settings, perfectly visualize your operating area.

### Personalized profiles for each surgeon

Customized settings can be programmed, stored and retrieved with contactless SCard using NFC technology. The tower is programmed facing the personalized settings for particular surgery for each surgeon.

### Fully controllable from the camera head

Thanks to the ISYME technology, all parameters can be controlled from the camera head: video parameters but also the light and the insufflator.

## SYMBIOZ Cam+ Full HD

# CONNECT YOUR LIGHT SOURCE FOR POWERFUL & BRIGHT SURGERIES

## SYMBIOZ Led

### Product benefits

#### Lifetime

An exceptional lifetime up to 50.000h thanks to the LED technology

#### Homogeneity of the light

No more halo effect thanks to the LED technology

#### Automatic light control

A light intensity automatically adapted depending on the surgical environment

Ref S\_298\_0001 EU  
Ref S\_298\_0002 US

### Be demanding with your light source

The light is one of the most important element during surgery, in fact, optimum settings and brightness allow a fluid act and essential visual comfort for the practitioner.

In this demanding and adaptability spirit, the COMEG teams have developed SYMBIOZ Led, the perfect light source.

Adapt the light according to your needs and enjoy bright surgeries!

### Remote control from the camera head

Thanks to the ISYME Function, the LED is connected to the camera and can be controlled directly from the camera head: Switch ON/OFF the light or adjust the intensity, remotely take control of the surgery!

#### LED Light Source:

- 50.000h lifetime
- LED intensity equivalent to a 300W Xenon light source
- Touch screen with 16:9 resolution
- Automatic light cable detection for safety
- Automatic luminosity adjustment
- Light can be controlled directly from the camera head

SYMBIOZ Led

# CONNECT YOUR INSUFFLATOR FOR A SAFE WORK ENVIRONMENT

## SYMBIOZ Flow

### Product benefits

#### Powerful automatic flow to maintain a selected pressure

The automatic adjustment of insufflation maintains the desired pressure to balance with leakages, in any conditions

#### Remaining CO<sub>2</sub> available directly displayed in minutes

Patented technology that allows the nurses to focus on others points than CO<sub>2</sub> cylinder replacement.

#### External exsufflation valve

Designed to avoid overpressure and cross contamination

**PATENTED\***

Remaining insufflation time displayed in minutes

Ref S\_698\_0001 EU  
Ref S\_698\_0002 US

### Focus on your patient, not your equipment

A system designed for the safety and wellness of patients. A controlled flow to maintain the selected pressure, an instant display of available CO<sub>2</sub>, an external exsufflation to minimize cross-contamination and precautionary messages displayed directly on the screen, offer comfort for both the patient and the surgeon.

Article from Pr A. Sezeur

« The choice of an insufflator should takes into account the risks linked to pneumoperitoneum in order to minimize them. The COMEG insufflator is designed to meet the safety requirements thanks to several innovations. »

Pr A. SEZEUR  
Groupe Hospitalier Diaconesses Croix St Simon, Paris, France

#### Insufflator:

- Insufflation can be controlled directly from the camera head
- From 2L/min to 45L/min insufflation range
- Automatic management of insufflation flow to maintain the desired pressure
- Proprietary technology to calculate remaining available insufflation time
- Insufflation pressures displayed simultaneously on both Monitor and Touch screen
- Large font, easy to read touch screen with 16:9 resolution
- Internal heating system
- Bariatric specific insufflation parameters
- External desufflation valve to minimize cross contamination and over insufflation
- Great efficiency in low pressure (8-9mmHg)

\* Developed in collaboration with Pr. A. Sezeur, Diaconesses Croix Saint Simon hospital, Paris, FRANCE  
[Patented UPMC / SOPRO SA]

# CONNECT YOUR INTUITIVE COMMUNICATION SYSTEM

Technology at your fingertips with **SYMBIOZ Master**, the software dedicated to your patient management and database, to use with SYMBIOZ.

## SYMBIOZ Master

### Product benefits

#### Remote panel

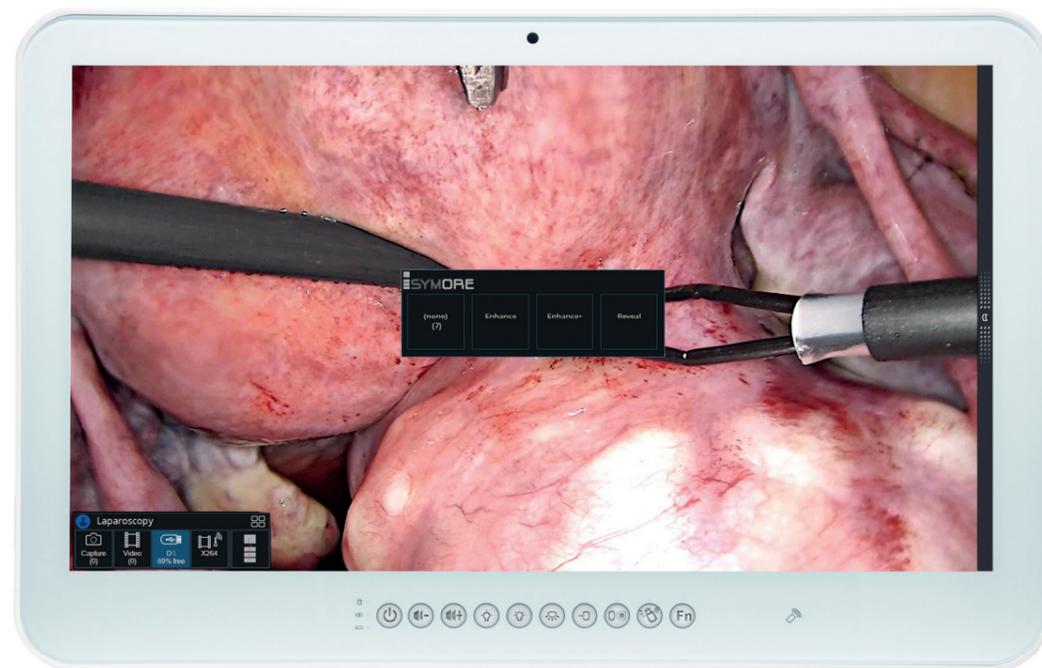

Control of all connected SYMBIOZ devices from one unique place in order to avoid the sterile surgical field and gets more accessibility to the functions.

#### Patient and doctor database management

Create, modify and save your patients and doctors data in one unique device.

#### ISYMORE

Chromatic image enhancement technology developed to improve anatomical vascularization visualization.

Ref S\_098\_0002 or S\_098\_0003 / DICOM license: S\_998611

### One tool, multiple possibilities with SYMBIOZ MASTER

#### Patient data

- Patient and doctor database management
- Full HD images and video recordings
- Visualization and edition of recorded/imported media
- Reports edition and customization
- Control of all connected SYMBIOZ devices from one unique place
- Feedbacks of essential information from SYMBIOZ devices

#### Streaming

The easy-going Streaming system allows various usages:

- Live surgeries
- Educational support
- Telehealth
- Remote monitoring

#### Dicom

Services available:

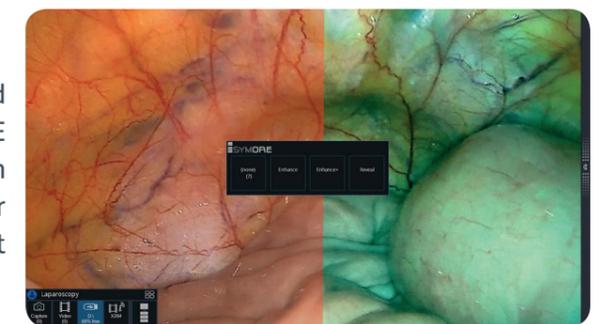

- Worklist
- Query / Retrieve
- Storage
- Print

Compatible modalities:

- CT (Computed Tomography)
- US (Ultrasounds)
- ES / VL (Endoscopy / Visible light)
- SC / OT (Secondary capture / Other)

#### ISYMORE

Early diagnosis is the key to control symptoms and prevent worsening of the pathology. Then, ISYMORE provides the surgeon with 3 different filters which allow him to improve tissue differentiation or highlight the darkest parts of the image and prevent overexposure.

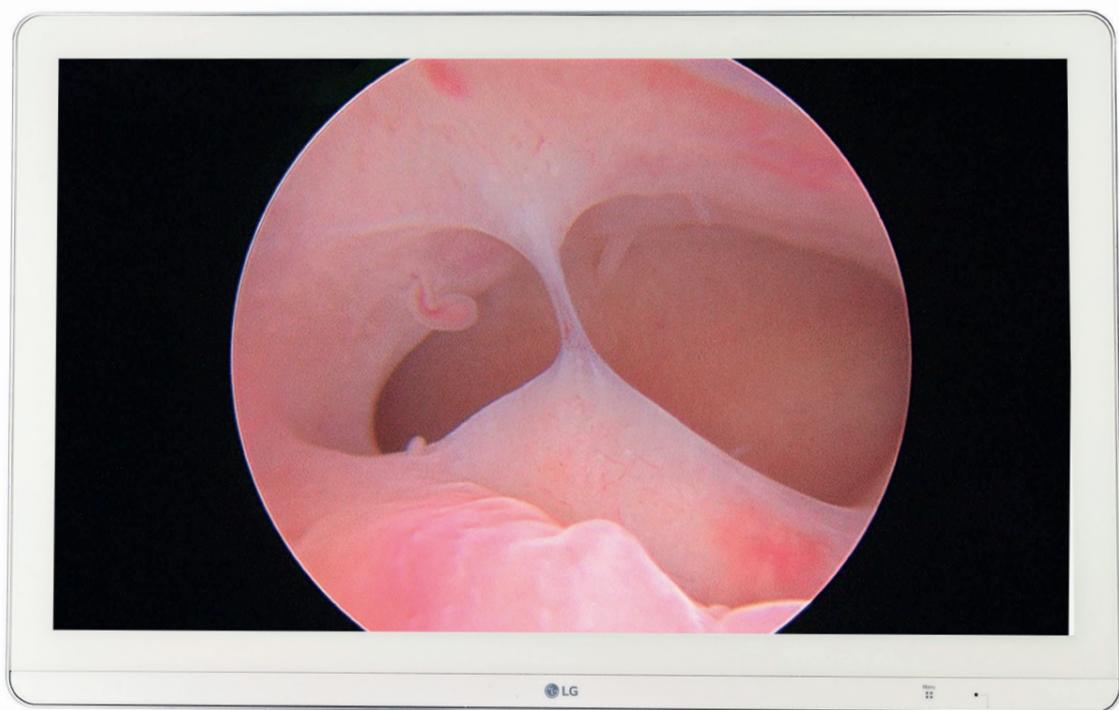

# CONNECT YOUR MONITOR

## Full HD solution

LG 27" Full HD monitor

A Full HD signal from the sensor to the monitor, the guarantee of always having the best image to perform the best surgeries.

Ref S\_700794

### Monitor:

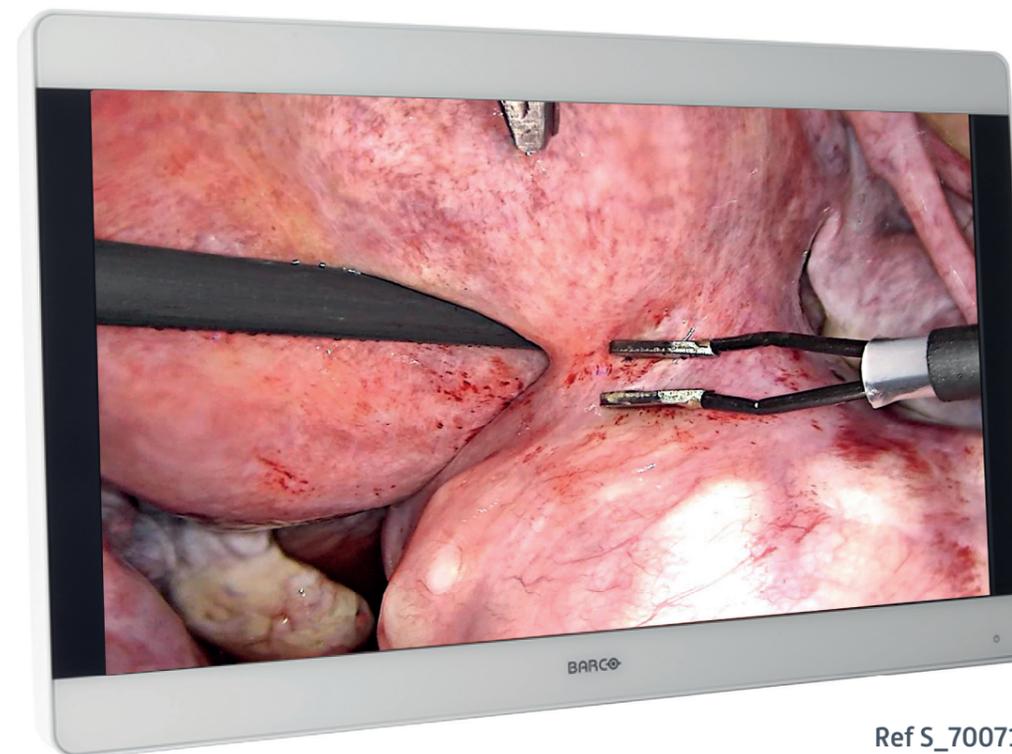

- Panel: 27" (16:9) - TFT AM LCD / IPS technology / LED backlight
- Resolution: Full HD (1920 x 1080 pixels)
- Luminance: 1000cd/m2 (Typ.)
- Contrast ratio: 1000:1 (Typ.)
- Viewing Angle (H/V): 178° / 178°
- Colors: 1000 million (10-bit)

- Video inputs: 1x HDMI (1.4), 1x S-Video, 1x Composite, 1x 3G-SDI, 1x DVI [Compatible with D-sub & Component via adaptor]
- Video outputs: 1x 3G-SDI, 1x DVI-D
- Mounting: 100x100 VESA
- Dimensions (W x H x D): 656 x 412 x 62 mm
- Weight: 7700 g
- Power supply: 100 - 240 VAC / 50 - 60 Hz

## 4K ready solution

Barco 31" 4K monitor

Go beyond the standards by upscaling your Full HD image to a 4K one. Improve your visibility and clearly see the details for optimized surgeries.

Ref S\_700711

### Monitor:

- Panel: 31" - TFT AM LCD / IPS-PRO technology / LED backlight
- Resolution: 4K-2K (4096 x 2160 pixels)
- Luminance: Max 550 cd/m2
- Contrast ratio: 1400:1
- Viewing Angle (H/V): 178° / 178°
- Colors: 1073 million (10-bit)

- Aspect ratio: 17:9
- Video inputs: 4K-UHD input selectable, FHD inputs (upscaled to UHD): 1 x DVI, 1 x 3G-SDI
- Video outputs: 1 x 3G-SDI, 1 x DVI
- Mounting: 100x100 & 200x100 mm VESA
- Dimensions (W x H x D): 777 x 472 x 93 mm
- Weight: 12100 g
- Power supply: 100 - 250 VAC / 47 - 63 Hz
